# Answers As Close As Your Own Backyard

How will your wastewater treatment systems accommodate ongoing growth and expansion of your community? What do you need to ensure compliance with regulatory requirements? Where can you find the personnel who not only have the necessary specialized knowledge, but are also good stewards of your financial resources? That's where PeopleService, Inc. is making a difference.

For more than 15 years, we've been operating, maintaining and managing wastewater systems for municipalities, communities and industries. Our full-service approach ensures you're able to access the expertise you need, by putting our people right in your community. So the answers you need are always as close as your own backyard.

## The Expertise You Need

Just as our name implies, people are at the center of the services we provide. And PeopleService has earned a reputation for the expertise and experience of our people. Each is educated, trained and certified in the specialty of water and wastewater management. So, you can feel confident in their ability to handle routine operations and maintenance, regulatory compliance, systems monitoring and planning.

## Your Full Service Resource

PeopleService offers you the full range of wastewater services – all accessible through a single point of contact. Even as your community grows and your needs change, you can continue to count on PeopleService to provide you with services that include:
