What's Important To You Is Important To Us

As communities welcome growth and expansion, they're also faced with the need to assure safe water that ensures the protection of their citizens and the environment. That's why PeopleService, Inc. continues to be the top choice of municipalities, villages and industries.

For more than 15 years, we've been operating, maintaining and managing water treatment systems, as well as a full range of wastewater treatment services. With PeopleService, you're able to access the expertise you need, by putting our people right in your community. It's proof that what's important to you is important to us – today and into the future

Expertise That's Second To None

The reason we're so good at what we do is the direct result of our ability to attract the most knowledgeable and experienced professionals in our industry. Each is educated, trained and certified in the specialty of water and wastewater management. What's more, they have the advantage of ongoing training and certifications that ensure that the programs and procedures they put into place help you to meet your obligations to the community and comply with regulatory requirements.

A Full-Service Approach To Water Systems

From the source to the tap, PeopleService offers you the full range of water services – all accessible through a single point of contact. Even as your community grows and your needs change, you can continue to count on PeopleService to provide you with services that include:

Routine Operations

- Establishment and implementation of required water sampling programs
- Operation, Maintenance and Management of water distribution and treatment facilities
- Supervision and mentoring of facilities staff

Ongoing Maintenance

- Line and hydrant flushing.
- Painting and corrosion prevention.
- Inspections and preventive maintenance.
- Minor repairs and replacement.
- Use of computerized maintenance program

Regulatory Compliance

- Prepare and submit required regulatory reports.
- Prepare and submit permit renewal applications.
- Implement and maintain required testing, analysis and reporting practices.
- Prepare Consumer Confidence Reports.
- Assist in the development and update of municipal codes regarding water management.
- Participate in compliance training to remain current with local, state and federal regulations.

Rates and Billing

- Assist to ensure proper rates for water services
- Ability to provide a water billing program

Safety

- Implement a safety program designed to comply with OSHA requirements.
- Participate in community programs designed to educate citizens of the importance of water systems in the safety of people and the protection of the environment.

Planning

- Assist with preparation of five-year capital plans.
- Cooperate with engineers and contractors in plant upgrades or new construction.

Discover The Power Of People

From the people we employ to the services we provide, PeopleService can make a difference in the way you're able to manage, maintain and grow your water systems – from production and storage, to distribution, rating and billing. Discover how other communities just like yours are putting the power of PeopleService to work for them.
